

EGI-Engage

Analysis of existing biodiversity informatics standards, tools and protocols and needs to support species relationship data

LW-CC D3.1 (internal)

Date	12 June 2015
Activity	[provide]
Lead Partner	CSIC/CIBIO
Document Status	DRAFT
Document Link	https://documents.egi.eu/document/XXX

Abstract

After an analysis of the framework of different standards, protocols and tools available within GBIF, the needs of adaptation/expansion to support species relationship data will be defined. Storage and organization needs of geo-referenced information on species interactions, extracted from the primary literature, will be considered. The system implemented will be able to build networks of potential interactions, based on the species that have been reported in a given area. Social network algorithms will be used to provide constraints on the network built by the researcher. The relationships should be connected with the environmental information layers, allowing the prediction of changes due to climate and land use change, estimate the impact of invasive species or the spread of agricultural and forest pests, and test the theory on the structure and dynamics of ecological networks.

3 Actions required for using the tools

Lorem

.

3.1 On the Implementation of xxxx

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Integer nec odio. Praesent libero. Sed

3.2 On the Implementation of ...

3.3 On the implementation of ...

4 Now for the lists and etc.

4.1 Bullet lists

- Item 1
- Item 2
- Item 3

4.2 Numbered lists

1. Item 1
2. Item 2

5 Figures and captions

5.1 Pictures

- WRAP TEXT: “in line with text”
- The caption should go after the picture
- The figures should be centred and the caption as well
- Do not use expressions such as “the picture above” or the “figure below” when referring to figures (it may be wrong!)
- When referring to figures in the text, please follow one or the two options:
 - Inline / non-abbreviated: E.g.: “Figure 1 shows many examples of butterflies showing dragon heads.”
 - In brackets / abbreviated: E.g.: “We demonstrated that many butterflies have dragon heads (Fig. 1)”

Fig.1 - The figures should be centred and the caption as well

5.2 Tables

- Keep the tables centred
- Use the preferred colour scheme when possible

Title of the Document / Number if required

- Use the 'no spacing' quick style or the 'normal' quick style for your tables
- Please place the caption above the tables.
- When referring to tables in the text please never abbreviate 'Table'

Table 1 – Preferred colour scheme
