

Virtual Sites Proposal

-  Service Endpoint (SE)
-  Virtual Site (no permissions over SEs). Cardinality of many-to-many with SE (i.e. a single VSite can be linked to many SEs, and a single SE can be linked to many VSites).
-  Physical Site (has permissions over SEs). Cardinality of 1-to-many with SE (i.e. a single Site can be linked to many SEs, but a single SE can only be linked to one Site).
